

# Schedulers 101 (breaks and lunch inbetween)

*Wednesday, 24 January 2018 11:10 (170)*

This section will train you in the mechanics of sending a job, monitoring its progress, cancelling it and inspecting the log files and results. It's contents build upon the shell basics discussed in the first section of this day. We will make a lunch break in the middle of this section.

## Summary
